

Saving the Environment, Saving You Money

- Community fundraising car washes and washing your car at home can use more than 4 times more water than Fabulous Freddy's. And the water used at fundraising car washes and washing at home is lost as it flows down the street. Fabulous Freddy's captures run off water and sends it to a water treatment center where it is cleaned and returned to the water cycle.
- Making sure all four tires are properly inflated and aligned can improve your gas mileage by about 3.3 percent, according to the U.S. Department of Energy.
- According to the Energy Department, using the wrong grade of motor oil can shave 1 to 2 percent off your fuel efficiency.
- Replacing a clogged air filter can improve gas mileage by 10 percent.
- The National Car Care Council estimates that in the U.S. we lose 147 million gallons of gas annually to evaporation due to damaged, loose or missing gas caps. Use a locking gas cap to make sure you're keeping every precious drop that you pump.
